

Databricks Certified Data Engineer specializing in architecting scalable enterprise data pipelines using Apache Spark, Airflow, Talend, and cloud-integrated ETL/ELT platforms. Proficient in SQL, Python, big data processing, and data migration, with cross-functional experience in software development, business intelligence, data analytics, machine learning, driving high-impact enterprise data and analytics outcomes.

TECHNICAL SKILLS

Programming Languages	: SQL, Python, Java, C/C++
Data Engineering & Big Data Tools	: Databricks, SparkSQL, Delta Lake, Medallion/Lakehouse Architecture, Greenplum/PostgreSQL, Airflow, Talend, ETL/ELT Pipelines, Data Modeling, Data Migration, CI/CD, Data Orchestration
Data Visualization & Analytics	: Power BI, Tableau, DAX, Excel , Jupyter Notebooks, Google Colab
Developer Tools & Environments	: Git/Github, DBeaver, RapidMiner, MySQL Workbench, SQL Plus, Postman
Frameworks & Web Technologies	: Spring Boot, Hibernate, JDBC, JPA, RESTful APIs, HTML, CSS

PROFESSIONAL CERTIFICATIONS

- **Databricks Certified Data Engineer Professional**
 - **Databricks Certified Data Engineer Associate**
 - **Academy Accreditation - Generative AI Fundamentals**
- **AWS Certified Cloud Practitioner**
 - **SnowPro Core Certification**
 - **Big Data Integration and Processing**

WORK EXPERIENCE

Data Engineer | Genpact, Bengaluru, India | *SparkSQL, Databricks, Airflow, VSC, Talend, GitHub, Dbeaver* Oct 2024—Dec 2025

- **Migrated 200+ Greenplum objects** to Databricks Medallion architecture by developing SparkSQL PXF/reverse-PXF connectors, DDL scripts, transformation logic and views, enabling scalable integration across AWS S3, Oracle, Smartsheet, Box, and other sources.
- **Automated Talend TAC workflows** by redesigning ingestion and egress pipelines into Airflow DAGs with GitHub CI/CD deployments and DBeaver metadata configurations, significantly **improving release efficiency** and **reducing manual pipeline operations**.
- Increased enterprise data reliability to **98%+ accuracy** across business domains by conducting Root Cause Analysis (RCA) of production failures and pipeline optimization with business stakeholders.
- Achievements: Awarded **Bronze Performance Excellence** recognition.
Selected for the **Top 20 – Unit Lead Development Program** from 2024 graduate batch FTEs.

GenAI Intern | Genpact, Bengaluru, India | *Python, NLP, ML, Generative AI (LLMs), Power BI, Excel, DAX, SQL* Feb 2024—Jul 2024

- Reduced average document length by **54.6%** and removed .docx duplicates (**0.97 semantic similarity**) by building an *AI de-duplication system* using NLTK, TF-IDF, LLM-based refinement, Affinity Propagation, and Sentence Transformers, improving data clarity and efficiency.
- Increased loan approvals by **20%** and reduced defaults by **25%** through a *Vehicle Financing Performance Dashboard* integrating Python ML models (**85% accuracy**) with SQL/DAX-driven data cleaning, feature engineering, visualization, and KPI tracking for strategic decision-making.

Software Development Intern | NMBR Systems Private Limited, Bengaluru, India | *Java, Spring Boot, SQL* Jun 2023—Jul 2023

- Built a Java/Spring Boot management system integrating MySQL, REST APIs, and Postman testing for reliable data operations.
- Optimized SQL queries, implemented JPA/Hibernate ORM with Java Streams to boost CRUD efficiency, workflows, and software efficiency.

Web Development Intern | D’Souza Metal Cutting Private Limited, Mumbai, India | *HTML, CSS* Jun 2022—Aug 2022

- Developed a responsive and intuitive UI for a PDF invoice generation application using HTML and CSS.

TECHNICAL PROJECTS

Supply Chain Management Platform | *Java, Spring Boot, SQL, HTML, CSS, Solidity* Jul 2024

- Engineered a full-stack platform featuring blockchain-based authentication with Ethereum and Solidity smart contracts.
- Implemented RESTful APIs with Hibernate and JDBC for efficient MySQL data integration, validating functionality through Postman testing.

Data Mining and Analysis: Analysis of Crime in India | *Python* Nov 2023

- Built a Crime Analysis Model using Indian crime data (2001-2010) with K-Means and DBSCAN clustering algorithms to analyse data attributes.
- Evaluated algorithm efficiencies with Silhouette scores, providing actionable insights for law enforcement.

EDUCATION

B.Tech in Computer & Communication Engineering (Minor: Big Data Analytics), Manipal Institute of Technology, Manipal, India 2020—2024

LEADERSHIP & ENGAGEMENT

- Campus Ambassador — Bazaarvoice, MIT Manipal : Organized campus hackathons and facilitated industry-academia collaboration initiatives.
- Core Committee Member — Revels Cultural Fest, MIT Manipal : Led vendor collaborations and logistics for large-scale university events.
- National Cadet Corps (NCC) : Built disciplined leadership, crisis management, and collaborative problem-solving abilities.
