Databricks Certified Data Engineer Professional experienced in building **cloud-native Lakehouse platforms** using **Apache Spark, Airflow, Talend, SQL and Python**. Skilled in **Medallion architecture, large-scale ETL/ELT pipelines**, and **data migrations**, with hands-on experience in **DAG debugging, data validation**, and **root cause analysis** to ensure reliable, production-grade data systems.

TECHNICAL SKILLS

Programming Languages : SQL, Python, Java, C/C++
Data Engineering : Databricks, Apache Spark, Delta Lake, Data Lakehouse, Medallion Architecture, Data Modeling, Data Migration
Data Pipelines & ETL : Apache Airflow, Talend, ETL/ELT Pipelines, DAG Debugging, Job Scheduling, CI/CD, Data Orchestration
Analytics & Visualization : Power BI, Tableau, DAX, Excel, Jupyter Notebooks, Google Colab
Backend & APIs : Spring Boot, RESTful APIs, Hibernate, JPA, JDBC
Developer Tools : Git/GitHub, DBeaver, Postman, MySQL Workbench, SQL Plus, RapidMiner

PROFESSIONAL CERTIFICATIONS

- **Databricks Certified Data Engineer Professional**
- Databricks Certified Data Engineer Associate
- Academy Accreditation - Generative AI Fundamentals
- **AWS Certified Cloud Practitioner**
- **SnowPro Core Certification**
- Academy Accreditation - AI Agent Fundamentals

WORK EXPERIENCE

Data Engineer | Genpact, Bengaluru, India | *SparkSQL, PySpark, Databricks, Airflow, VSC, Talend, GitHub, Dbeaver* Oct 2024—Dec 2025

- Engineered SparkSQL ETL pipelines migrating **900+** Greenplum/PostgreSQL objects to **Databricks Lakehouse (Medallion Architecture)**.
- Built multi-source **ingestion & egress pipelines** (Amazon S3, Oracle, MySQL, Smartsheet, Box) enabling centralized enterprise data access.
- Redesigned Talend TAC workflows into **Airflow DAGs** with **GitHub CI/CD** and DBeaver metadata, boosting pipeline automation by **~80%**.
- Achieved **98%+** enterprise data accuracy via **root cause analysis**, log diagnostics, and **SIT** validation across distributed Spark ETL pipelines.
- Achievements: Awarded **Bronze Performance Excellence** recognition.
Selected as a **Top 20 Performer** (rare for <4 YOY) - inducted into the **Technical Leadership Development Program**.

GenAI Intern | Genpact, Bengaluru, India | *Python, NLP, ML, Generative AI (LLMs), Power BI, Excel, DAX, SQL* Feb 2024—Jul 2024

- Completed 16-week Data Engineering & Analytics program with hands-on Python, SQL, Power BI, and Generative AI (NLP, ML, LLMs).
- **Project 1 🚀**: Built **AI-powered document deduplication system** using NLTK, TF-IDF, LLMs, Sentence Transformers, and Affinity Propagation, reducing average document length by **54.6%**, eliminating .docx duplicates (**0.97** semantic similarity), and improving data clarity.
- **Project 2 🚀**: Developed a **Vehicle Financing Performance Dashboard** with Python ML models (**85%** accuracy) and SQL/DAX-driven data cleaning, feature engineering, visualization, and KPI tracking, increasing loan approvals by **20%** while reducing defaults by **25%**.

Software Development Intern | NMBR Systems Private Limited, Bengaluru, India | *Java, Spring Boot, SQL* Jun 2023—Jul 2023

- Built Java/**Spring Boot** management system with MySQL and **REST APIs** to automate workflows and enable reliable **CRUD** operations.
- Optimized SQL queries and implemented **JPA/Hibernate ORM** with **Java Streams**, streamlining data processing and reducing manual effort.
- Integrated Postman API testing to ensure consistent, error-free data operations.

Web Development Intern | D’Souza Metal Cutting Private Limited, Mumbai, India | *HTML, CSS* Jun 2022—Aug 2022

- Developed responsive UI for PDF invoice generation using HTML and CSS, cutting manual processing time by **50%**.

TECHNICAL PROJECTS

Data Mining and Predictive Analysis: Analysis of Crime in India 🚀 | *Python, Pandas, NumPy, Scikit-learn, Matplotlib*

- Built crime analysis model on 10-year India dataset using Python, Pandas, NumPy, Scikit-learn, Matplotlib; applied **K-Means** and **DBSCAN**.
- Developed preprocessing and visualization pipelines in Google Colab, validating clusters (**0.744** silhouette score) for accurate crime insights.

Supply Chain Management Platform 🚀 | *Java, Spring Boot, SQL, HTML, CSS, Solidity*

- Engineered full-stack supply chain platform with **blockchain-based authentication** using Ethereum and Solidity smart contracts.
- Implemented **RESTful APIs** with **Hibernate** and **JDBC** for MySQL integration, validating reliable inventory and order processing with Postman.

EDUCATION

B.Tech, Computer & Communication Engineering (Minor: Big Data Analytics)
Manipal Institute of Technology, Manipal, India 2020—2024

Relevant coursework: Database Systems, Data Structures & Algorithms, Operating Systems, Big Data Modelling & Processing, Data Mining, Machine Learning with Big Data, Cloud Computing, Computer Networks

LEADERSHIP & ENGAGEMENT

- Campus Ambassador — Bazaarvoice, MIT Manipal : Led hackathons and drove industry-academia initiatives.
- Core Committee Member — Revels Cultural Fest, MIT Manipal : Managed vendor partnerships and large-scale event logistics.
- National Cadet Corps (NCC) : Developed leadership, discipline, and crisis management skills.

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Konkani (Native)
- Kannada (Fluent)
- French (Basic)
